PROFESSIONAL SUMMARY

Data professional with a strong foundation in both data analytics and machine learning, backed by hands-on project and internship experience. Proficient in Python, SQL, Power BI, Tableau and ML frameworks like Scikit-learn and XGBoost. Delivered a process mining project with EUR 5M+ projected savings and built an 82% accuracy phishing detection model. Awarded 3rd place at HNSC University Datathon. Currently pursuing an M.Sc. in Big Data Analytics, actively seeking entry-level opportunities as a Data Analyst or ML Engineer.

TECHNICAL SKILLS

Programming & Query	Python, SQL, Java, C, HTML, CSS
Data Visualization & Analysis	Excel, Power BI, Tableau, Qlik Sense, Pandas, NumPy, PySpark
Machine Learning	Scikit-learn, XGBoost, LightGBM, TF-IDF
Process Mining	Celonis Process Intelligence Platform
Databases	MySQL, PostgreSQL, MongoDB
DevOps & Tools	Git, GitHub, Docker, Jenkins, CI/CD, Linux, Hadoop

EDUCATION

M.Sc. Big Data Analytics, St. Xavier's College, Mumbai — Expected 2027
CGPA: 9.48/10

BCA in Analytics, Kristu Jayanti University, Bengaluru — 2022 – 2025
CGPA: 8.64/10

EXPERIENCE

Software Developer Intern — June 2024 – July 2024
St. Joseph's College — *Calicut, India*

- Designed an ETL pipeline to extract, transform, and load student records from MySQL into a PHP/JavaScript front-end, automating ID card generation and reducing manual data entry errors by 90%.
- Optimized database queries and data transformation logic, streamlining real-time data retrieval for over 1,000+ student records and improving administrative reporting efficiency.

DATA ANALYTICS & ML PROJECTS

- **WoodCorp Order-to-Cash Process Mining** *(Celonis Process Intelligence Platform, Excel, PowerPoint)*
  Analyzed delivery delays using Celonis to trace root causes in the order-to-cash cycle. Proposed process improvements increasing on-time delivery from 65.6% to 80%, unlocking EUR 5M+ in annual savings. Developed interactive executive dashboards to track KPIs and present findings to stakeholders.
- **Phishing URL Detection Model** *(Python, Pandas, Scikit-learn, Streamlit)*
  Engineered 20+ features from URL structure, domain age, and SSL metadata. Trained a LightGBM classifier achieving 82% accuracy and deployed it via a Streamlit web app. Enriched the training dataset using Tranco, VirusTotal, and Google Safe Browsing APIs.
- **Film Library Valuation for IP-Backed Lending** *(Python, XGBoost, Scikit-learn, Optuna, Streamlit)*
  Built an ML framework to value film libraries as loan collateral, predicting box-office revenue for 16,048 films using metadata and text features on a leakage-aware chronological split. Tuned 5 models with Optuna; the selected HistGradientBoosting model reached $R^2 = 0.52$ and 6.85× top-decile lift on the 2018–2024 test set. Linked predictions to a five-year DCF valuation and LTV-based loan sizing, delivered via a Streamlit dashboard.

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations (2026) • NPTEL – Database Management Systems, Python • Qlik Sense – Business Analyst, Data Architect • Celonis – Rising Star: Technical & Automation • Google Academy – Advanced Google Analytics • ICT Academy – Learnathon (2022, 2023)
