PROFESSIONAL SUMMARY

Data professional with a strong foundation in both data analytics and machine learning, backed by hands-on project and internship experience. Proficient in Python, SQL, Power BI, Tableau and ML frameworks like Scikit-learn and XGBoost. Delivered a process mining project with EUR 5M+ projected savings and built an 82% accuracy phishing detection model. Awarded 3rd place at HNSC University Datathon. Currently pursuing an M.Sc. in Big Data Analytics, actively seeking entry-level opportunities as a Data Analyst or ML Engineer.

TECHNICAL SKILLS

Programming & Query	Python, SQL, Java, C, HTML, CSS
Data Visualization & Analysis	Excel, Power BI, Tableau, Qlik Sense, Pandas, NumPy, PySpark
Machine Learning	Scikit-learn, XGBoost, LightGBM, TF-IDF
Process Mining	Celonis EMS
Databases	MySQL, PostgreSQL, MongoDB
DevOps & Tools	Git, GitHub, Docker, Jenkins, CI/CD, Linux, Hadoop

EDUCATION

M.Sc. Big Data Analytics, St. Xavier's College, Mumbai Expected 2027
CGPA: 9.48/10

BCA in Analytics, Kristu Jayanti University, Bengaluru 2022 – 2025
CGPA: 8.64/10

EXPERIENCE

Software Developer Intern June 2024 – July 2024
St. Joseph's College *Calicut, India*

- Designed an ETL pipeline to extract, transform, and load student records from MySQL into a PHP/JavaScript front-end, automating ID card generation and reducing manual data entry errors by 90%.
- Optimized database queries and data transformation logic, streamlining real-time data retrieval for over 1,000+ student records and improving administrative reporting efficiency.

DATA ANALYTICS & ML PROJECTS

- WoodCorp Order-to-Cash Process Mining** *(Celonis EMS, Excel, PowerPoint)*
Analyzed delivery delays using Celonis EMS to trace root causes in the order-to-cash cycle. Proposed process improvements increasing on-time delivery from 65.6% to 80%, unlocking EUR 5M+ in annual savings. Developed interactive executive dashboards to track KPIs and present findings to stakeholders.
- Phishing URL Detection Model** *(Python, Pandas, Scikit-learn, Streamlit)*
Engineered 20+ features from URL structure, domain age, and SSL metadata. Trained a LightGBM classifier achieving 82% accuracy and deployed it via a Streamlit web app. Enriched the training dataset using Tranco, VirusTotal, and Google Safe Browsing APIs.
- Music Catalog Valuation for IP-Backed Banking Loans (Ongoing)** *(Python, Pandas, XGBoost)*
Developing an AI-powered valuation framework for music catalogs as collateral assets by combining streaming analytics, revenue forecasting, and corporate-finance models. Leveraging Spotify and YouTube data to engineer predictive features and build pipelines for five-year cash-flow forecasting, DCF valuation, risk scoring, sensitivity analysis, and Loan-to-Value (LTV) recommendations for banking applications.

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations (2026) • NPTEL – Database Management Systems, Python • Qlik Sense – Business Analyst, Data Architect • Celonis EMS – Rising Star: Technical & Automation • Google Academy – Advanced Google Analytics • ICT Academy – Learnathon (2022, 2023)
